

Environmental Management Policy

[Environmental Management Policy]

Recognizing energy conservation and environmental preservation as core values of our management, we have established and are actively implementing the following environmental management policy to realize a sustainable carbon-neutral society:

1. All employees, including those of our partner companies, will make every effort to prevent environmental pollution during their work activities.
2. In order to practice carbon neutrality, we will promote resource conservation in our daily activities, reduce, reuse, and recycle waste, and strive for a circular resource flow.
3. Through technological innovation, such as the development of eco-friendly products, we will actively respond to the climate crisis and strengthen our environmentally friendly management based on our environmental management system.
4. We will comply with domestic environmental laws and regulations, set strict management standards, and make efforts to minimize environmental impacts.

[Goals]

Zero environmental pollution incidents and resource conservation.

[Key Initiatives]

1. Minimize environmental impacts and establish response systems.
2. Reduce wastewater discharge and energy consumption.
3. Comply with legal standards for the emission of pollutants.
4. Reduce waste discharge.
